Some questions on viscosity solutions and related topics

Hitoshi ISHII, Waseda University

Abstract: I shall discuss some questions on viscosity solutions theory and related topics. A list of examples which I wish to cover are (1) the well-posedness of boundary value problems for degenerate elliptic equations for non-smooth domains, (2) an asymptotic problem for p-Laplace equations as p goes to infinity, (3) the weak KAM theorem for the Neumann problem, and (4) a question related to a representation formula of solutions of Hamilton-Jacobi equations.
